Director's Track

Well, 2023 is almost history.

Our 2023 Riding Season has passed.

Our 2023 Chapter A Christmas Party is over.

Our thoughts of Group Rides for 2023 are over.

What we must do now is to look forward to 2024.

Our first action as Chapter A for 2024 will be our annual Black Eyed Pea Ride on January 1st. We usually have a large turnout for this event and some good weather will make it a great start for 2024.

We will be having our Chapter A OPS meeting on Jan 6th at which time we will initiate our plans for rides in 2024. We have already started our plan for our annual September Group ride which will include Indiana, Michigan, Canada, New York, Pennsylvania, Ohio and then back home. This is a trip that we have been anticipating for the last couple of years.

For 2024 we have gotten off to a new start with a lot of changes within the Chapter. We have new people in all of the following Chapter positions: Assistant Directors, Treasurer, Pins & Patches, clothing director, Couple of the year representatives, Individual of the Year representative, and a new Ride Coordinator. Don't fear, Don will still be very much involved as Assistant Ride Coordinator.

When you think of all the new changes, it might make some members a little anxious. I can assure you that all the position changes are being manned by very responsible and well-known individuals. I have never been involved with such a great group of individuals. All the great members of this Chapter are responsible for the chapter running so smoothly and it is a great chapter to be involved with. We are certainly admired and envied by all other Kentucky Chapters. Please keep up the good work. You sure make Angela and I look good. We really appreciate that!

We hope that every one of you have a Great Holliday Season and look forward to seeing you all next year.

The Limit Point

Most of us love riding on scenic roads with curves, we tend to look for roads like this to ride. We often use advisory speed limits to judge the speed we can negotiate a corner. A technique taught by some instructors is the limit point analysis or limit point theory. The limit point may also be referred to as the vanishing point.

The limit point is the furthest uninterrupted point you can see on the road ahead, this point is the intersection of the sides of the road at the horizon. When approaching a curve one of three things can happen to the limit point. If you are going too fast for the curve the limit point will move towards you, if you match the speed of the point so that it isn't moving towards you then you should be at a correct speed for the curve. If the point is moving away from you, the corner is straightening, and you may increase speed.

The speed at which the point approaches indicates the sharpness of the curve, if the point suddenly begins approaching while in a curve it indicates a reducing radius curve which requires a reduction of speed.

The most important idea with limit point or vanishing point riding is that you must always be able to stop safely before reaching the limit point whether the road is straight or curved.

Membership Enhancement

Dean Miller/Miles Justice

Merry Christmas Chapter A! We hope everyone has enjoyed the contests we have run this past year as your Co-Membership Enhancement Coordinators. Without your participation, they would be meaningless. As of now, we plan to bring back both the Scavenger Hunt and Copycat Challenge for 2024. There is no December CC Photo, but a new picture will be available at the January meeting with your contest entries due at the February meeting. As you can imagine, the Scavenger Hunt list takes a little more time to compile, so that will most likely not be available until sometime later in the year – probably March.

As always, we welcome and appreciate any input you might have regarding challenges or other activities that you would like to see us implement. Our purpose is to facilitate all of you – the members – having fun and enjoying your time with Chapter A.

Congratulations to Chanel Blue for winning the \$10 Roosters gift card in the most recent Copycat Challenge. Thanks to all of you for your entries!

Also, congratulation to Steve and Brenda Snook for successfully completing the annual Scavenger Hunt and winning a \$50 Shell gas card. We hope that even more of you will take on the challenge in 2024!

State Educator's Report

**Rick and Kim
Artmayer**

State Educator

For my last article for 2023, I thought I would share some technical information about lithium, a chemical element of the alkali metal group that is the lightest metal known and one that is used especially in alloys and glass, in mechanical lubricants, and in storage batteries. In the periodic table, its symbol is Li, its atomic weight is 6.939, its atomic number is 3, and its specific gravity is 0.53 at 20°C.

Lithium is the 33rd most abundant element on Earth, but it does not naturally occur in its pure form due to its high reactivity. Lithium metal, due to its alkaline properties, is corrosive and reacts with water. Breathing lithium dust or alkaline lithium compounds irritates respiratory tracts. Prolonged exposure to lithium can cause nervous system disorders, and it can cause fluid to build-up in the lungs, leading to pulmonary edema. The metal itself is a handling hazard because of the caustic hydroxide produced when it is in contact with water, which can cause an explosion.

There are three sources of lithium: underground mines, surface clay, recycling, and brine water. 87 percent of the world's lithium comes from the brine water, with the highest lithium concentrations found in Bolivia, Argentina, and Chile.

Lithium mining carries high environmental costs. Mining companies operating in the salt plains of South America, which are essentially high deserts, require extensive extraction operations and use nearly two-thirds of the available fresh water, leaving very little for farming and livestock.

The smallest currently available source of lithium is that contained in recycled electronics. While lithium recycling is not yet capable of yielding material pure enough for reuse in batteries, it can be used in glass and ceramics, the second-largest lithium-consuming industry after the manufacturing of lithium-ion batteries.

And, since the Thanksgiving holiday seems to come and go so quickly:

Q: Fruit comes from a fruit tree, so where does turkey come from? A: A poul-tree.

Q. If pilgrims traveled on the Mayflower, what do college students travel on? A. Scholar ships

Q: What would you get if you crossed a turkey with a ghost? A: A poultrygeist!

I hope your holidays are safe and happy.

State COY Coordinators

State Couple of the Year Coordinators

Happy December everyone!! Kent and I had a great Thanksgiving and are looking forward to December to spend time with family and friends for the holidays. Our Chapter A Christmas party is just around the corner, and we are of course looking forward to that. We've had a few cold days so far but hope we will get a day or two here or there of unseasonably warm weather where we could maybe take the bike out for a little ride! (Fingers crossed). As the year ends, we look back on great memories with our Wing'd Rider family and all our Couple and Individuals of the Year. It's been a lot of fun and we are looking forward to the new couples and individuals selected for 2024. We want to thank the couples and individuals for their participation this past year and we hope they have had fun too because that's what it is all about!!

Chapter A 2023 Couple of the Year **and State Couple** Dean and Lora Miller

It's hard to believe the year is almost over. Although we came in late it has been so much fun being COY to such an awesome Chapter. We actually miss chasing Oliver and bringing him with us on our adventures. Lora and I would like to thank Kent and Karen for their wonderful guidance. We are looking forward to Debi and Tony taking on the role as next years Chapter A

COY and hope they have as much fun as we did representing this amazing group!

We are super excited about the upcoming Ops meeting so we can introduce the new mascot and watch the fun as next year's COYs fill the photo album with new pics of its travels almost as much as we are excited to be able to dress up and attend our first Prom and we look forward to seeing you all there.

The weather has not been very cooperative lately, but we are hopeful to have some riding time in the coming month.

We wish all of you a very Happy Holiday!!

COY/IOY Raffle 2024

The Couple of the Year/Individual of the Year raffle item has been selected. Did you know that the proceeds from this raffle are needed to support the COY/IOY program? We ask that everyone please help keep this fun activity going by purchasing a raffle ticket or two or three from your chapter's COY/IOY.

Chapter A's Individual of the Year and State Individual: Miles Finley Justice

Well, y'all this is it – my final newsletter article as Chapter A Individual of the Year. Given the nature of the season, the only appropriate thing to do is to express my gratitude to all of you. It has been an honor serving as your IOY for two consecutive years. Hopefully, I have represented Chapter A well both inside and out of the state during that time. I have enjoyed being one of the “public faces” of the greatest (former) GWRRA and current Wing'D Rider chapter in the country. But, I am definitely ready to pass the baton to the incoming 2024 IOY. Congratulations to Chanel Blue! I know you will rock it out girl!

Much Love and Happy Holiday Wishes to All! Let's make 2024 the Best Chapter A Year Ever!!!!
